

TEB2014 Software Engineering and HCI	
Lab Assignment 7 – System Development	
Student names & IDs:	
1. 2. 3.	4.

The Hello World project is a time-honored tradition in computer programming. It is a simple exercise that gets you started when learning something new. Let's get started with GitHub!

In this assignment, you will learn how to:

- ✓ Create and use a repository.
- ✓ Start and manage a new branch.
- ✓ Make changes to a file and push them to GitHub as commits.
- ✓ Open and merge a pull request.

1. Create a GitHub Account. [2marks]
2. Create a Repository. [2marks]
3. Create a new branch of the Repository. [2marks]
4. Make and commit changes. [2marks]
5. Open a Pull Request. [2marks]
6. Merge your Pull Request. [2marks]
